EDUCATION

Johns Hopkins University **Aug 2025 – Expected Dec 2026**
M.S. Financial Economics | GPA: 4.0 / 4.0 *Washington DC, US*
Coursework: Financial Economics, Microeconometrics (Panel Data & Cross-Section), Financial Intermediation, CGE Modeling

Shandong University **Sep 2021 – Jun 2025**
B.A. Finance (Banking & Securities) | B.Laws, Dual Degree | GPA: 3.8 / 4.0 *Shandong, CN*

University of California, Santa Barbara **Apr – Sep 2024**
Exchange Program, Statistics & Mathematical Finance | GPA: 3.8 / 4.0 *California, US*

PROFESSIONAL EXPERIENCE

AfriLabs Connect Deal Room (ACDR) **Jun 2026 – Present**
Market & Venture Intelligence / Analytics Intern *Remote*
- Analyzed private-market deal flow across venture and growth-stage transactions; built SQL and Power BI pipelines and dashboards tracking financing rounds, sector concentration, and funnel conversion from sourcing to close.
- Synthesized transaction and market data into recurring intelligence briefs supporting investor matching, pipeline prioritization, and leadership decision-making.

State Street **Jan – Jul 2025**
Global Delivery, Analytics & Operations Intern *Hangzhou, CN*
- Redesigned cross-regional operational workflows and built end-to-end data capture and aggregation pipelines; consolidated 600+ operational checklists into a centralized database, improving workload traceability and allocation efficiency by ~30%.
- Built Power BI KPI dashboards from multi-source datasets; translated operational performance trends into executive reports supporting leadership resource allocation and capacity planning.
- Identified automation and control gaps across 5+ business functions; delivered data-backed process improvement recommendations and set documentation standards for data quality, validation, and reporting accuracy.

Huatai Securities **Jun – Aug 2024**
Fixed Income Dept., Infrastructure Bond Research Intern *Shanghai, CN*
- Built fixed-income pricing and scenario models to evaluate yield sensitivity under parallel and non-parallel curve shifts of ±50 to 200bps; analyzed infrastructure bond issuance, credit spreads, and risk-return dynamics under policy-driven rate volatility.
- Constructed SQL-based data pipelines converting 100+ regulatory and policy announcements into structured event indicators and sector-level datasets; assessed policy shock impacts using event-study comparisons with robustness checks.
- Conducted issuer-level credit and valuation assessments; synthesized quantitative outputs into investment memos and slide decks for senior analysts, translating macro-fiscal dynamics into actionable investment insights.

Central University of Finance and Economics **Nov 2022 – Jan 2023**
Institute of Green Investment (IGI), Research Assistant *Beijing, CN*
- Authored a 5,500-word industry report on China's energy storage sector covering regulatory incentives, cost-decline trends, capital intensity, and investment feasibility; report reached 10,000+ readers and was awarded Gold Prize in a national university innovation competition.

RESEARCH & PROJECT EXPERIENCE

AI-Powered Market Intelligence & Automated Trading System **2026 – Present**
- Built an AI agent workflow in Python (LLM tool-calling) integrating equity, news, and Polymarket data, with automated refreshes, missing-value handling, and validation checks to generate analytical reports and alerts.
- Automated the end-to-end process from market monitoring to analysis, notification, and trade execution, removing manual steps; added output validation to keep AI-generated analysis accurate and auditable.

Credit Application Scorecard, Credit Risk Modeling **Jan – Mar 2026**
- Developed a credit underwriting scorecard in Python using logistic regression with WOE/IV variable selection; built a 9-variable model spanning three underwriting dimensions (ability to pay, willingness to pay, loan terms).
- Implemented score scaling with custom PDO; evaluated via KS statistics on training and validation samples (KS = 0.33); conducted score cutoff analysis linking predicted PD thresholds to approval rates and portfolio bad rates.

SKILLS & TOOLS

Finance & FP&A: Financial Modeling, Forecasting & Scenario Analysis, Financial Statement Analysis, KPI & Variance Analysis, DCF/Comps, Credit Analysis, Fixed Income Valuation, Investment Memo Writing
Data & Analytics: SQL, Python (Pandas, Statsmodels), R, Stata, EViews; Time Series, Panel Data Econometrics, Event-Study Design
Tools & AI: Excel (Advanced/Macros, Power Query, Pivot Tables), Power BI, Bloomberg Terminal, Wind, Git; AI tools (Claude Code, Cursor, GitHub Copilot, LLM agent workflows)
Certifications: CFA Level I Candidate, Exam: Nov 2026
